Education

Kalinga Institute of Industrial Technology May 2027
B.Tech. Computer Science and Engineering CGPA: 9.30

Delhi Public School Kalinga / NIOS June 2022
High School 86.2%

Skills

Languages: C/C++, Python, Java, JS/TS, C#, Kotlin, Go, .NET, SQL | **DevOps:** AWS, Docker, K8s, CI/CD, Terraform
Frameworks: Flutter, React, NextJS, FastAPI, PyTorch, TensorFlow | **Tools:** Git, Linux, Unity, ROS, Redis, Supabase

Experience

Olive Ridley Media | *Freelance SDE (AI & Product Strategy)* Feb 2026 – Present

- Architected **Vedic Daily** backend, achieving **150ms latency** for AI guidance using **FastAPI** and **Gemini**; implemented caching to reduce external API costs by **30%**.
- Developed **3 cross-platform Flutter widgets** (2x2, 4x2, 4x4), resulting in a **12% boost** in DAU via deep-linking.
- Designed a **3-phase product roadmap** (Text → Comics → Video) for an Indic-first platform, optimizing content ingestion throughput by **40%** via automated LLM-driven summarization.
- Engineered a **10-question structured onboarding flow**, increasing profile completion rates by **30%** and enabling hyper-personalized predictions for 500+ active users.

Famcare | *Lead Full-Stack Developer* | Koramangala, Bangalore | Onsite Mar 2026 – Present

- Architected full-stack ecosystem (**FastAPI, 3 Flutter apps**) from MVP to production with 500+ commits; scaled API to handle **2,000+ req/min** with 100% success rate.
- Developed a business logic engine for **15+ service categories** with dynamic pricing and **Razorpay/FCM** integration.
- Optimized deployment velocity by **70%** using **Fastlane CI/CD** and automated caregiver verification via **SpringVerify API**.

Endorphind | *Founding SDE (AI & Systems)* | Indiranagar, Bangalore | Onsite Jan 2026 – Present

- Engineered generative video pipelines using Wan 2.6 and LatentSync; optimized digital avatar production by **60%** through custom **ComfyUI** node automation and media generation tools.
- Architected "LangLearn," an LLM-driven platform; managed the end-to-end **4-month project lifecycle** from technical roadmap to delivery for 3 major client architectures.
- Leading a team of **3 SDE interns** via Agile/Scrum; delivering Decision-as-a-Service chatbots for the hospitality sector.

shoppin' — USAR Commerce Technologies | *Founding SDE* | Gurgaon, Haryana | Onsite Dec 2024 – Nov 2025

- Productionized AI systems for fashion search at scale (**3-4 crore items**) using CLIP/VLLM and diffusion-based VTON.
- Engineered distributed image/video pipelines; Dockerized models on SageMaker; developed backend with Redis caching.
- Architected AWS EKS infrastructure with Terraform, GitOps, CI/CD, and high-throughput scraping agents.

CosQ.in Ecosystem | *Full-Stack & AI Product Lead* Jan 2024 – Present

- WHAM! OTT:** Built a comic-themed streaming platform with a custom hybrid video engine (**HLS**); implemented cross-origin watch synchronization via **postMessage** and immersive UI animations.
- MemoChan:** Engineered an AI SaaS for automated transcription/summarization using GPU-accelerated **Whisper models** and speaker diarization to streamline long-form audio documentation.
- PreviouslyOn:** Developed an LLM-driven content discovery platform using **Gemini AI** and **Next.js**; implemented advanced SEO with JSON-LD to maximize organic visibility.

Projects & Publications

Dual-head Transformer-LSTM for Physiotherapy Exercise Recognition FACEIT 2026

Open-source Python Library for Human Gait Analysis and Recognition FICTA 2026

Systematic Review of Deep Neural Frameworks for Fall Risk Assessment Elsevier 2025

NVD Exploitability Toolkit | *Fine-tuned DistilBERT/GPT2 on 56k vulnerabilities* 85.6% Accuracy

Leadership & Awards

Microsoft Learn Student Ambassador | *AI-ML Volunteer* Jan 2025 – Present

KIIT E-Cell | *RnD Intern* | Organized \$150K Hackathons 2023 – 2024
