Skills

Languages: Python, C/C++, JavaScript/TypeScript, Java, Go, Kotlin, C#, SQL
Frameworks & Libraries: FastAPI, Flutter, React, Next.js, PyTorch, TensorFlow, ROS2, ComfyUI
Cloud & DevOps: AWS (EKS, SageMaker), Docker, Kubernetes, Terraform, GitOps, CI/CD (Fastlane/Actions)
Databases & Systems: PostgreSQL, Redis, Supabase, Low-Latency Systems, Distributed Architecture

Experience

- FamCARE** Apr 2025 – Present
Lead Full-Stack Architect & Systems Lead HSR Layout, Bangalore
 - Architected and delivered the complete full-stack ecosystem, scaling a modular **FastAPI backend** and **3 cross-platform Flutter apps** from zero to production with **500+ commits** across 4 repositories.
 - Engineered a high-throughput API architecture verified via stress testing to handle **2,000+ requests/minute** and **100 concurrent users** with a **100% success rate** for core operational flows.
 - Engineered a modular monolith architecture with **15+ decoupled services** (modules) designed for the **Strangler Pattern**, managing complex **Order/Booking** flows, **Razorpay** payments, and a multi-channel notification engine (**FCM, Fast2SMS, MSG91**).
 - Optimized operational velocity by **70%** using **Fastlane CI/CD** and automated caregiver background verification via **SpringVerify API**, reducing turnaround time from days to minutes.
- Endorphind** Jan 2026 – Present
Founding SDE (AI & Systems) Indiranagar, Bangalore
 - Engineered SOTA generative video pipelines using Wan 2.2/2.6 and LatentSync; integrated ElevenLabs and F5 for high-fidelity voice cloning, and developed custom ComfyUI nodes for automated media production.
 - Architected "LangLearn," an LLM-driven educational platform; led technical roadmap and project scoping.
 - Leading a team of 3 SDEs via Agile/Scrum; overseeing client architectures for Video Diffusion and AI chatbots.
- shoppin' — USAR Commerce Technologies** Dec 2024 – Nov 2025
Founding ML Engineer (AI/Infra) Gurgaon, HR
 - Productionized AI systems for fashion search (3-4 crore items) using CLIP/VLLM embeddings and Diffusion VTON.
 - Engineered distributed media pipelines on AWS SageMaker; automated scraping for 200+ partner stores.
 - Architected AWS EKS infrastructure with Terraform and GitOps, ensuring disaster recovery and high availability.
- SMLab, NISER** May 2024 – Nov 2024
Research Intern (Robotics & Sensors) Jatni, OD
 - Crafted iPhone-Drone Sensor Calibration system with **180Hz** data transmission; built Web Console for self-driving motorcycle (ROS2) handling 25+ sensors with **0.2ms** latency.

Education

Kalinga Institute of Industrial Technology (KIIT) May 2027
B.Tech in Computer Science and Engineering CGPA: 9.30/10.0

Projects & Publications

A Hybrid Transformer-LSTM Framework for Physiotherapy Recognition FACEIT 2026
Open-source Python Library for Human Gait Analysis (gaitSetPy) FICTA 2026
Deep Neural Frameworks for Fall Risk Assessment Elsevier - AI in Medicine
NVD Exploitability Toolkit | *Hugging Face, PyTorch* ICANTCI 2025

- Fine-tuned DistilBERT/GPT2 on 56k+ vulnerabilities; achieved **85.6% accuracy** in exploitability prediction.

Leadership & Awards

KIIT E-Cell | RnD Intern: Organized hackathons (\$150K prize pool) and managed 120+ teams. 2024
Microsoft Learn Student Ambassador | AI-ML Volunteer: Led ForgeTube AI video gen system. 2025
Awards: KIIT Merit Scholarship (Top 1000 Rank), Oxford-Cambridge Research Scholarship.
